Abraham Stoner,	South Whitley, Ind.
George Oswald Warrington,	South Charleston.
Edward Wilson,	Warren.

ADMISSION.

CANDIDATES for admission to the Preparatory Department must be at least twelve years of age, and for admission to the Freshman Class, fourteen.

In all cases, satisfactory testimonials of good character must be given; and of students coming from another college, a certificate of regular dismission is required.

Candidates for admission to the Freshman Class, in addition to the common English branches, will be examined in the books prescribed in our Preparatory Course; or, if they come from other schools, where different text-books are used, in that which shall be deemed an equivalent to this Course.

Candidates for advanced standing are examined in the Preparatory studies, and also in those that have been pursued by the class they propose to enter, or others equivalent to them.

Students coming from other Colleges are examined, and, if found qualified, admitted to the same standing they sustained in the College from which they received their dismission.

The examination for admission to College Classes will take place on Saturday and Monday preceding Commencement, June 19th and 21st. All candidates will meet in College Chapel on Saturday at 9 o'clock a. m. Another examination will be had at the same place on Tuesday and Wednesday preceding the opening of the College Year, commencing on Tuesday at 9 o'clock a. m.

COURSES OF STUDY.

CLASSICAL.

FRESHMAN YEAR.

FIRST TERM.

GREEK.	Homer—*Iliad;* Hadley's Greek Grammar; Arnold's Greek Prose Composition.
LATIN.	Livy; Arnold's Latin Prose Composition.
MATHEMATICS.	Olney's Geometry.
HISTORY.	Smith's Sacred History.

SECOND TERM.

GREEK.	Xenophon—*Memorabilia;* Arnold's Greek Prose Composition.
LATIN.	Livy; Arnold's Latin Prose Composition.
MATHEMATICS.	Olney's Geometry.
NATURAL HISTORY.	Huxley's Physiology.

THIRD TERM.

GREEK.	Xenophon—*Memorabilia;* Arnold's Greek Prose Composition.
LATIN.	Horace—*Odes* and *Epodes;* Arnold's Latin Prose Composition.
MATHEMATICS.	Algebra.
NATURAL HISTORY.	Botany.

SOPHOMORE YEAR.

FIRST TERM.

LATIN.	Horace—*Satires* and *Epistles;* Arnold's Latin Prose Composition.
MATHEMATICS.	Olney's Trigonometry.
CHEMISTRY.	Roscoe's Chemistry; Lectures.

ELECTIVE.*

GREEK.	Herodotus; Arnold's Greek Prose Composition.
HEBREW.	Green's Hebrew Grammar.
MODERN LANGUAGES.	German Grammar; French Grammar.

SECOND TERM.

PHILOSOPHY.	Wayland's Political Economy.
GREEK.	Thucydides; Arnold's Greek Prose Composition.
CHEMISTRY.	Cooke's Chemical Philosophy; Lectures.

ELECTIVE.

LATIN.	Cicero—*De Natura Deorum;* Arnold's Latin Prose Composition.
HEBREW.	Green's Hebrew Grammar.
MODERN LANGUAGES.	German Grammar and Reading; French Grammar and Reading.

THIRD TERM.

GREEK.	Plato—*Gorgias.*
MATHEMATICS.	Olney's General Geometry.
PHYSICS.	Deschanel's Mechanics, Hydrostatics, Pneumatics, and Heat.

ELECTIVE.

LATIN.	Plautus—*The Captives* and *Trinummus.*
HEBREW.	Selections from the Pentateuch.
MODERN LANGUAGES.	German Reading; French Reading.
CHEMISTRY.	Analytical Chemistry.

* The student must select one of the studies marked "Elective" in addition to the required studies.

JUNIOR YEAR.

FIRST TERM.

PHILOSOPHY.	Haven's Mental Philosophy.
LATIN.	Tactitus—*Histories.*
ENGLISH.	Fowler's English Language.

ELECTIVE.

GREEK.	Demosthenes.
HEBREW.	Historical Books.
MODERN LANGUAGES.	German—Schiller's *Wilhelm Tell;* French—Pascal.
MATHEMATICS.	Olney's Calculus.

SECOND TERM.

PHILOSOPHY.	Haven's Mental Philosophy; Natural Theology (Lectures).
GREEK.	A Greek Drama.
PHYSICS.	Deschanel's Heat and Electricity.

ELECTIVE.

LATIN.	Juvenal—*Satires.*
HEBREW.	Poetical Books.
MODERN LANGUAGES.	German—Goethe's *Iphigenie;* French—Racine.

THIRD TERM.

PHILOSOPHY.	Wayland's Moral Science.
PHYSICS.	Deschanel's Acoustics and Optics.
LATIN.	Quintilian—*Institutes.*
NATURAL HISTORY.	Geology and Zoology (Lectures).

ELECTIVE.

GREEK.	A Greek Drama.
HEBREW.	Prophets.
MODERN LANGUAGES.	German—Goethe's *Faust;* French—Siecle de Louis XIV.
CHEMISTRY.	Analytical Chemistry.

SENIOR YEAR.

FIRST TERM.

PHILOSOPHY.	Whately's Logic; Butler's Analogy of Religion.
NATURAL HISTORY.	Dana's Manual of Geology.
ENGLISH.	English Literature.

SECOND TERM.

PHILOSOPHY.	Whately's Rhetoric.
LATIN.	Select Readings.
MATHEMATICS.	Loomis' Astronomy.
LAW.	Andrew's Manual of the Constitution of the United States.

THIRD TERM.

PHILOSOPHY.	History of Philosophy (Lectures); Hopin's Evidences of Christianity; Kames' Elements of Criticism.
GREEK.	Greek Testament.
ENGLISH.	English Criticism.

Throughout the College Course there is a weekly recitation in the Greek Testament.

Fuerst's Hebrew Lexicon; Green's Hebrew Grammar; Grammarie Francaise, Poitevin; Histoire de la Litterature Francaise, Demogeot; Deutsche Grammatik, Heyse.

SCIENTIFIC.

FRESHMAN YEAR.

FIRST TERM.

MATHEMATICS.	Olney's Geometry.
CHEMISTRY.	Roscoe's Chemistry; Lectures.
LATIN.	Cæsar — *Commentaries;* Harkness' Latin Grammar.
HISTORY.	Smith's Sacred History.

SECOND TERM.

MATHEMATICS.	Olney's Geometry.
CHEMISTRY.	Cooke's Chemical Philosophy; Lectures.
LATIN.	Virgil—*Æneid;* Harkness' Latin Grammar.
NATURAL HISTORY.	Huxley's Physiology.

THIRD TERM.

MATHEMATICS.	Algebra.
PHYSICS.	Deschanel's Mechanics, Hydrostatics, Pneumatics, and Heat.
LATIN.	Virgil—*Æneid;* Latin Antiquities.
NATURAL HISTORY.	Botany.

SOPHOMORE YEAR.

FIRST TERM.

MATHEMATICS.	Olney's Trigonometry.
ENGLISH.	Fowler's English Language.
NATURAL HISTORY.	Physical Geography.

ELECTIVE.

Latin, French, or German.

SECOND TERM.

PHYSIOLOGY.	Wayland's Political Economy.
MATHEMATICS.	Mensuration, Surveying, and Navigation.
CHEMISTRY.	Qualitative Chemical Analysis; or
NATURAL HISTORY.	Museum Practice.

ELECTIVE.

Latin, French, or German.

THIRD TERM.

MATHEMATICS.	Olney's General Geometry.
MINERALOGY.	Dana's Manual.
CHEMISTRY.	Qualitative Chemical Analysis; or
NATURAL HISTORY.	Museum Pratice.

ELECTIVE.

Latin, French, or German.

JUNIOR YEAR.

FIRST TERM.

PHILOSOPHY.	Haven's Mental Philosophy.
MATHEMATICS.	Olney's Calculus.
NATURAL HISTORY.	Mivart's Anatomy.

ELECTIVE.

Latin, French, or German.

SECOND TERM.

PHILOSOPHY.	Natural Theology (Lectures); Haven's Mental Philosophy.
PHYSICS.	Deschanel's Heat and Electricity.
NATURAL HISTORY.	Mivart's Anatomy.

ELECTIVE.

Latin, French or German.

THIRD TERM.

PHILOSOPHY.	Wayland's Moral Science.
PHYSICS.	Deschanel's Acoustics and Optics.
NATURAL HISTORY.	Geology and Zoology (Lectures); Physiology.

ELECTIVE.

Latin, French, or German.

SENIOR YEAR.

FIRST TERM.

PHILOSOPHY.	Whately's Logic; Butler's Analogy of Religion.
NATURAL HISTORY.	Dana's Geology.
ENGLISH.	English Literature.

SECOND TERM.

LAW.	Andrew's Manual of the Constitution of the United States.
PHILOSOPHY.	Whately's Rhetoric.
MATHEMATICS.	Loomis' Astronomy; Church's Descriptive Geometry.

THIRD TERM.

PHILOSOPHY.	History of Philosophy (Lectures); Hopkins' Evidences of Christianity; Kames' Elements of Criticism.
MATHEMATICS.	Church's Descriptive Geometry.
ENGLISH.	English Criticism.

Preparatory Courses of Study.

CLASSICAL.

JUNIOR YEAR.

FIRST TERM.

GREEK.	Goodwin's Grammar.
LATIN.	Harkness' Introductory Book.
PHYSICS.	Natural Philosophy.

SECOND TERM.

GREEK.	Goodwin's Greek Grammar.
LATIN.	Harkness' Grammar and Reader.
ENGLISH LANGUAGE.	Hart's Course of Composition and Rhetoric.

THIRD TERM.

GREEK.	Goodwin's Greek Grammar.
LATIN.	Harkness' Grammar and Reader; Ovid—*Metamorphoses.*
ENGLISH LANGUAGE.	Hart's Course of Composition and Rhetoric.

SENIOR YEAR.

FIRST TERM.

GREEK.	Xenophon—*Anabasis*; Greek Grammar.
LATIN.	Cæsar—*Commentaries;* Harkness' Latin Grammar.
MATHEMATICS.	Algebra.
ANTIQUITIES.	Fiske's Ancient Geography, Classical Chronology, and Greek and Roman Mythology.

SECOND TERM.

GREEK.	Xenophon—*Anabasis;* Greek Grammar; Classical Antiquities.
LATIN.	Virgil—*Æneid;* Latin Grammar.
MATHEMATICS.	Algebra, continued.

THIRD TERM.

GREEK.	Xenophon—*Anabasis;* Greek Grammar.
LATIN.	Virgil—*Æneid;* Latin Grammar; Classical Antiquities.
MATHEMATICS.	Algebra to Binomial Theorem.
HISTORY.	Anderson's Modern History.

SCIENTIFIC.

FIRST TERM.

LATIN.	Harkness' Introductory Book.
MATHEMATICS.	Algebra.
PHYSICS.	Natural Philosophy.
GEOGRAPHY.	Fiske's Ancient Geography.

SECOND TERM.

LATIN.	Harkness' Latin Grammar and Reader.
MATHEMATICS.	Algebra, continued.
ENGLISH LANGUAGE.	Hart's Course of Composition and Rhetoric.
HISTORY.	Anderson's Ancient History.

THIRD TERM.

LATIN.	Harkness' Latin Grammar and Reader; Ovid—*Metamorphoses.*
MATHEMATICS.	Algebra to Binomial Theorem.
ENGLISH LANGUAGE.	Hart's Course of Composition and Rhetoric.
HISTORY.	Anderson's Modern History.

In addition to the studies named in these courses, instruction will be given, each term, in Arithmetic and English Grammar; and, during the First Term, in Modern Geography.

It is the especial design of this Department to prepare students to enter one of the University courses. It is open, however, to others qualified to enter its classes.

GENERAL INFORMATION.

MODERN LANGUAGES.

In view of enabling the student to possess himself of the keys to the rich treasures of Continental Science and Literature, and of responding to the growing importance—especially in the West—of a knowledge of German in all of the professions, provision is made for electing German or French throughout the Sophomore and Junior Years.

Special effort is made to render the knowledge of these languages living and practical. As the student advances, he is trained not merely in translating the printed language, but also understanding it when spoken, and in speaking it himself.

ELECTIVE STUDIES.

All the studies of the Freshman Year are required. At the opening of the Sophomore Year, the classical student can commence a course of Hebrew, French, or German, extending through the Sophomore and Junior Years; otherwise he must continue with Latin and Greek, as indicated under the term *Elective*. The scientific student can elect French or German; otherwise he must continue with Latin. A selection having been made of any course, the student is not permitted to change, except by special permission of the Faculty. Of the studies marked *Elective* in any term, the student must take one, in addition to the required studies of the term.

SURVEYING.

Special attention is given to Practical Surveying. For this purpose the Institution is furnished with the best instruments now in use.

CHEMISTRY.

In first and second terms of the Sophomore Year of the Classical Course and the Freshman Year of the Scientific Course, there is a daily exercise in General Chemistry, consisting of lectures, with experiments and recitations. During the second and third terms, instruction is given to the Scientific Sophomores in Qualitative Analysis; and in the third term, in Determinative and Descriptive Mineralogy.

At any time, students who are qualified can enter the Analytical Laboratory, where they are furnished with the necessary apparatus and chemicals for completing a course in Qualitative and in Quantitative Analysis. Each student here performs his operations and makes his investigations, under the immediate supervision of the Professor of Chemistry. Care is taken while the student acquires precision and skill in chemical manipulations, he shall also thoroughly acquaint himself with the laws and principles of the science.

Besides the general courses in Qualitative and Quantitative Analysis, courses have been arranged for the analysis of urines, and of the more common poisons. The Course of Urinalysis occupies two weeks, and that of Toxicology about six weeks. The Course of Determinative Mineralogy consists of one hundred minerals, to be determined by blow-pipe analysis. A chemical library, belonging in part to the Professor of Chemistry, and in part to the Analytical Laboratory, is opened for the constant use of the student. Chemicals and apparatus are furnished at the usual retail prices, which constitutes all the charge made.

ANATOMY AND PHYSIOLOGY.

Instruction is given in Physiology during the second term of Freshman Year, by daily recitations and lectures. The work is illustrated by preparations in Human and Comparative Anatomy, by diagrams, and by constant examination of the organs and tissues of our domesticated animals. [*Text Book, Huxley's Lesson's," sixth edition.*]

During Junior Year of the Scientific Course, there is a daily exercise in Comparative Anatomy. The instruction has especial reference to those who expect to pursue a medical training after graduation. Each member of the class is expected to present a dissection of some one of our common animals. [*Text-Book, "Mivart's Lesson's."*]

BOTANY, ZOOLOGY AND GEOLOGY.

During the third term of Freshman Year, there is a daily exercise on the elements of Structural and Systematic Botany. The students are required to present for examination an herbarium of not less than one hundred flowers from selected families of this flora. [*Text-Book, "Gray's School and Field Book."*]

The members of the Sophomore Class—Scientific Course—may, if they so desire, elect *Zoological Laboratory practice* during the second and third terms. They will be taught the principles of the science, and to classify and arrange specimens in Natural History. Such students will have daily access to the Museum of the University, and the library of the Curator. [*Text-Books, Nicholson's "Study of Biology," and Nicholson's Zoology.*]

A Course of Lectures is given during one-half of the third term of Junior Year on Zoology, as a special preparation for the study of Geology. The students are required to take notes of the lectures, and pass an examination on the same, at the close of the term.

Geology is taught during the first term of Senior Year. The study is made practical by means of the large collections of the Museum, and by excursions to places of interest. [*Text-Book, "Dana's Manuel."*]

Instruction is given in Physical Geography during the first term of the Sophomore Year, scientific course. [*Text-Book, "Geike's Lessons" or Guyot.*]

RELIGIOUS INSTRUCTION.

Morning worship is held in the College Chapel, at the opening of the exercises each day of the week, except Sunday.

On Sabbath, all the students are required to attend one public service, at such Church as the Faculty understand to be preferred by the parents or guardians, and in the afternoon, at three o'clock, at the College Chapel.

A students' prayer-meeting is held every Saturday night, in one of the lecture-rooms of the University; and, at nine o'clock on Sabbath morning, Bible-classes are taught by members of the Faculty, which all have the privilege of attending.

MUSEUM.

The Museum of the University embraces three distinct Cabinets:

William Wood Cabinet.

Founded by William Wood, Esq., of Cincinnati, Ohio.

This collection comprises a full set of the celebrated casts of fossils prepared by Prof. Ward, of Rochester, N. Y. It contains faithful representations of all the rare and unique specimens found in the Museums of Europe and America.

Mann Cabinet.

Founded by the late R. P. Mann, M. D., of Milford, Ohio.

This collection is devoted to the exhibition of the fossils and rocks illustrative of the geological ages. Several thousand specimens are arranged in regular order; among others, a fine suite of the fish-remains belonging to the Corniferous period.

Prescott Cabinet.

The Prescott Cabinet is devoted to the General Department of Natural History. The basis of this collection was purchased from Dr. Prescott, of Concord, New Hampshire, in 1859; since which time constant and valuable additions have been made.

The Zoological Department now contains fifty species of quadrumana and quadrupeds; over sixty preparations in comparative and human anatomy; two hundred and thirty specimens of birds, representing nearly two hundred distinct species; one hundred and two specimens of reptiles, and one hundred specimens of fishes; five hundred crabs and lobsters, in articulates; and fifty-three species of corals, and eight hundred star fishes, in radiates.

The Section in Conchology consists of more than eight thousand shells, embracing six hundred land-shells, one thousand fluviatile, and over six thousand marine shells. Among the lat-

ter are included five hundred and sixty species of marine shells, deposited by the Smithsonian Institute.

The Mineralogical Department contains four thousand two hundred distinct entries, arranged in the natural order illustrated in Dana's System of Mineralogy.

This Cabinet also contains two hundred and sixteen species of woods, and two hundred and fifty-nine species of grasses, all native to the State of Ohio. These are the contribution of the Rev. Charles H. Warren, M. A., of the Ohio Conference, by whom they were collected and labeled. Fifty species of moss, collected and presented by Rev. Herman Herzer, of Louisville, Ky.

Additions to the University Museum for the Year ending May 15, 1875.
